Accessories

LIVESCRIBE PULSE SMARTPEN

This high-tech pen (\$199) brings note-taking to a new level. When writing on Livescribe's microdot-loaded paper, you can tap a word to hear what was said as you wrote it (a useful feature for students and journalists). When you connect the pen to your PC, your notes appear on-screen. The 2GB of onboard memory will hold 32,000 pages of text and up to 200 hours of recorded speech.

SKOOBA CHECKTHROUGH BAG

Skip the hassle of pulling your laptop out of your bag and dumping it in a plastic bin at airport security. Skooba's Checkthrough Bag (\$139), designed for 15.4-inch notebooks, can pass through X-ray machines without having to remove your notebook. It also has 20 compartments, pockets, and organizers for your other gadgets.
