Reviews from schools and the press.

"This is a tool that is portable, lightweight and discreet. It can help them compete on the same playing field as everyone else." – John Wolfe, PH.D. Wright State University Newsroom

WRIGHT STATE UNIVERSITY

"Many of the students reported that the pen reduced their classroom anxiety and freed them up to pay better attention." – UC Berkeley School of Information

UC Berkeley School of Information

"These technologies help level a playing field for individuals who would not be able to demonstrate their capabilities as learners." Brant Parker, Director of Learning & Innovation Technology, Calgary Board of Education – New York Times
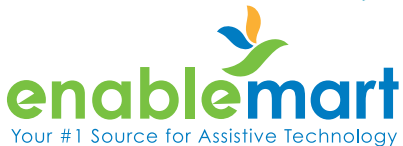

The New York Times

Reviews from students.

"I love this pen. I am an auditory learner and if I can hear the professor explain it again, I am able to remember how to do a problem." – Victoria S.

"This pen has completely transformed the way I study. I'm an auditory and visual learner, so when I am able to go back, look at my notes, and hear what my professor is saying at the same time, it is very beneficial! This has saved my grades in several of my classes." – Taylor S.

"For someone with memory problems, like me, this is a wonderful solution. I have taken notes and recorded lectures before, but being able to tap a note and instantly hear just that part of the lecture makes a gigantic difference. I have used it extensively in my homework and test prep. This semester I'm getting an A, and have gotten 100% on every chapter test so far." – Summer H.

livescribe. *Smartpens*

Take the stress out of class

Smartpens capture everything you hear and write in class so you can be confident that you'll never miss a word.

The Echo™ smartpen captures words, diagrams, scribbles, symbols and audio—and syncs everything you hear to what you write.

Livescribe lets you organize your notes to fit your learning style. Transfer all your smartpen notes and recordings to your computer to search for key phrases and create custom virtual notebooks to better organize your notes.

Don't settle for confusing notes. Just tap on your notes and your smartpen will play back what the teacher said—as many times as you need to hear it.

Even take your interactive notes and audio on the go on your Apple® iPad®, iPhone® or iPod touch®.

Convenient play back controls on your Livescribe paper* allow you to slow down or speed up the audio recording and even bookmark key information.
